What we are doing

Supporting local communities

As part of the process of **local development policies**, Sardinia Region promotes the consolidation of a unitary and shared governance model, capable of guaranteeing the necessary coordination and an adequate level of effectiveness of public action (regional law nr. 3/2022, art. 15)

In particular, it **supports local communities** in the context of territorial planning, through initiatives aimed at supporting the administrative capacity of the parties involved in the development processes, in order to improve the communities' projects.

For these purposes, the expenditure of **5 Meuros** has been authorized for each of the years 2022, 2023 and 2024 to support the local communities' projects, also through the Local Action Groups within the Community-Led Local Development (CLLD) approach.

What we have to do

A large iceberg floating in the ocean. The tip of the iceberg is visible above the water surface, while the much larger, jagged base is submerged underwater. The word 'TODO' is written in large, bold, red capital letters across the submerged part of the iceberg.
